

CATCH THE BUGS WITH US!

TESTING LAB

How to shape the quality of your application before the production release?
How to improve your app quality? How to secure the full functionality?
How to get the best customer reviews? Do you want more stars?
How to ensure fast testing of new app functionalities?

Management

Software/App
Testing

Reporting

Let's beat the bugs together! Let's go and TEST IT!

HOW DOES IT WORK?

- Preparation of testing scenarios in defined systems such as TestRail
- Reporting of identified problems in required systems such as Asana or JIRA
- Management of testing in the form of the Kanban method
- Organization of meetings with the development/project team
- Regular reporting of the results

WHY BET ON US?

We will become your partner on the way to quality and functional application. We will provide you with full support in testing, control of the functionality, and the overall organization of testing.

RSM Technology benefits from the experience with the grill market leader. For this reason, we have become part of their transformation from conventional products into the smart ones.

LUCIE
ODEHNALOVÁ

Lucie as a testing team manager is the contact person for the customers.
